**We offer** prefabrication of pipelines and steel structures, comprehensive welding and locksmith services from design to the finished product. We use **welding methods**, i.e. TIG, MMA, MIG, MAG. We are distinguished by **quality and an individual approach to each client**. We carry out all orders in accordance with the technical documentation. Moreover, cooperation with a hot-dip galvanizing plant and a powder coating plant brings additional benefits to our contractors.

We mainly provide services in the field of:

-  Prefabrication of pipelines for the food and chemical industries, water and sewage management, offshore and steel mills
-  Production of steel, load-bearing and supporting structures
-  Welding of tanks, heat exchangers, devices, bases and frames made of stainless steel and aluminium
-  Manufacture of barriers, balustrades, platforms and technical ladders
